

Former Goulburn Gasworks Remediation Project

Community Notification - 3 June 2019

Commencement of Sheet Pile Installation for the Foreshore Remediation Works Pedestrian and Vehicle Detour information

Jemena is currently undertaking remediation works at the former Goulburn Gasworks site located at 1 Blackshaw Road, Goulburn and on the Council-owned adjacent foreshore area along the Mulwaree River.

The historical gasworks-related operations and waste disposal activities have contaminated the soil and groundwater at the site as well as extending off-site in groundwater to the east of the site along part of the foreshore of Mulwaree River. As such, remediation of the former gasworks site and adjacent foreshore area has commenced.

From 11 June 2019 (weather and site conditions pending), work will commence on the construction of a sheet pile coffer dam which is designed to allow excavations of contaminated material to be removed along the foreshore area adjacent to the former Gasworks site. Construction of the coffer dam requires drilling and driving 5 metre long sheet piles into the ground and interconnecting the piles around the extent of the area along the foreshore to be remediated. These will stand approximately .0.5 metres high and will cut off access to the area.

There will be no pedestrian or vehicle access to this section of foreshore during these works – commencing on Tuesday 11 June through to Friday 28 June (weather and site conditions pending). The foreshore will then be reopened with a pedestrian detour around the work area – until the next stage of excavation works commence in July 2019.

Work will be undertaken during standard construction hours; Monday – Friday 7am – 6pm and Saturdays 8am – 4pm.

You may notice an increase in noise and vehicle movements during the work, however, every effort will be made to minimise the impact of the work on the community.

If you have any questions or want to know more, please contact us on 1800 571 972 during business hours or email goulburn@jemena.com.au.

Thank you for your patience and cooperation during this important remediation project.
