

Former Goulburn Gasworks Remediation Project

Community Notification – 4 July 2019

Remediation Project – Update on Progress of works

Jemena is currently undertaking remediation works at the former Goulburn Gasworks site located at 1 Blackshaw Road, Goulburn and on the Council-owned adjacent foreshore area along the Mulwaree River.

The historical gasworks-related operations and waste disposal activities have contaminated the soil and groundwater at the site as well as extending off-site in groundwater to the east along part of the Mulwaree River foreshore. As such, significant remediation work is required.

To date, the remediation work has progressed well. We have successfully treated over 6,000 m3 of contaminated soil (equivalent to almost two and a half Olympic sized swimming pools) and are well over the half-way mark for the project. The project is on-track (weather and site conditions dependant) for the completion of contaminated soil treatment in late-August 2019 and demobilisation from site in late 2019.

The foreshore area adjacent the gasworks site has been temporarily closed whilst piling works are undertaken to construct the sheet pile coffer dam. The coffer dam will enable the remediation of contaminated material at depths of 2 metres below ground level, whilst protecting the adjacent Mulwaree River. Following completion of these works we will provide a project update to notify residents of the foreshore re-opening.

You may have noticed an odour during this work. We have increased our control measures across the site to suppress and limit odours, and will continue to make every effort to minimise the impact of odours. Whilst odours may be a nuisance and unpleasant, please be assured that we undertake regular monitoring throughout the day along the project boundaries, to ensure levels are within acceptable exposure limits.

Work is undertaken during the hours; Monday – Friday 7am – 6pm and Saturdays 8am – 4pm.

If you have any questions, have any concerns, or want to know more, please contact us on **1800 571 972** during business hours or email **goulburn@jemena.com.au**.

Thank you again, for your patience and cooperation during this important remediation project.
